

Food Patterns Equivalents Database 2011-2012

USDA's Food Patterns Equivalents Database 2011-12 (FPED 2011-12) converts foods and beverages in the Food and Nutrient Database for Dietary Studies (FNDDS) 2011-12 to 37 Food Patterns (FP) components. The FPED (formerly, the MyPyramid Equivalents Database) provides a unique research tool to evaluate food and beverage intakes of Americans compared to recommendations of the 2010 Dietary Guidelines for Americans. The FP components are defined as the number of cup equivalents of Fruit, Vegetables, and Dairy; ounce equivalents of Grains and Protein Foods; teaspoon equivalents of Added Sugars; gram equivalents of Solid Fats and Oils; and number of Alcoholic Drinks. The FPED release also includes: Food Patterns Equivalents Ingredient Database (FPID) that includes the 37 FP components for each unique ingredient used in FNDDS 2011-12; and listings of gram weights for one cup equivalents of fruits, vegetables, legumes and dairy foods in FPED 2011-12 (Methodology and User Guide, Appendices 8-11).

FPED 2011-12 Products

- Methodology and User Guide;
- The amount of 37 FP components present per 100 grams of each of the FNDDS 2011-12 foods and beverages (FPED) and their unique ingredients (FPID), in MS Access and SAS;
- The amount of 37 FP components in each food and beverage reported by each respondent on day 1 and day 2, and the total per day in What We Eat in America (WWEIA), NHANES 2011-12, and the respondents' demographic information, in SAS;
- Four table sets containing estimates of mean intakes of the 37 FP components on day 1, by demographic subgroups; and
- SAS codes file to create mean intake estimates of the 37 FP components on day 1, by demographic subgroups.
